# SPEEDY<sup>®</sup>turn

Correctable twin-bladed tool for the machining of gearwheels - hard

SPEEDY<sup>®</sup>turn - impossible to be more productive!

Correctable twin-bladed tool for the hard machining.  
Faster and precisely inside turning.

- more than 1 mm/ revolution feedrate
- correctable trough x-axis
- high process reliability
- better hole quality
- double feed rate
- from  $\varnothing$  13 mm

The machining process for the gearwheel production gets new defined!

Gearwheel production

**$V_c = 170 \text{ m/min}$     $f = 0,7 \text{ mm/U}$**
